

93

AMENDMENT TO H.R. 2454
OFFERED BY MR. LARSEN OF WASHINGTON

Page ____, after line _____, insert the following
new section:

1 SEC. ____ . SENSE OF CONGRESS.

2 It is the sense of Congress that the United States
3 should—

4 (1) continue to actively promote, within the
5 International Civil Aviation Organization, the devel-
6 opment a global framework for the regulation of
7 greenhouse gas emissions from civil aircraft that rec-
8 ognizes the uniquely international nature of the in-
9 dustry and treats commercial aviation industries in
10 all countries fairly;

11 (2) work with foreign governments to ensure
12 that foreign carbon emissions reductions regimes are
13 neither duplicative nor unnecessarily complicated for
14 the aviation industry; and

15 (3) when an appropriately rigorous inter-
16 national standard for civil aviation greenhouse gas
17 emission reductions is established by the Inter-
18 national Civil Aviation Organization or through any
19 other international agreement, act to exempt civil

1 aviation in the United States from a United States-
2 only greenhouse gas regulatory scheme and instead
3 should be allowed to operate under such a global
4 standard.
